Thread: [SEO / backlink panel? Suggest me one](#)

Popular - February 26, 2025, 7:07 pm

Looking for suggestions on an affordable seo panel where you can buy seo related stuff / backlinks, etc.

All the mainstream ones charge WAY too much, and I am looking for some connects on the low/mid range specifically.

Unfortunately, SEO costs money these days, if you want quality, you will have to pay. Most panels are not worth it tbh.

What kind of links are you looking for? It really depends on your project. Are you looking for long-term growth or is it a churn and burn spam site? Check out my thread if you want niche edits/link insertions.

You can also do outreach yourself to sites in your niche or check out some of the backlink Facebook groups. There's a lot of shit there but I've been able to find some decent guest post sites for \$50-60 and the finder fee is normally around \$20.

I agree and there is not such panel all come down to outreach and really good connection with webmasters.

I can help you share me tg and let connect.

Update on this. I did a lot of digging and some panels do have decent sites. There's a lot of crap to sift through though. Ive been using this tool to find the cheapest price on specific high traffic sites: <https://linkdetective.pro/> and it's free!

Oh wow this tool seems pretty sweet.

Thanks for the share

Be careful, buying links can be a dangerous game! If Google catches you, your website might get deindexed.

Consider trying white-hat techniques first.
