Thread: [BTC under 80k](#)

Chrome - February 27, 2025, 8:07 pm

Hey guys,

So BTC has dropped under 80k for the first time since the 10th of November.

Who saw this coming? I know I didn't..... Am I going to post another thread soon saying "BTC under 70k"?

Beaks - February 27, 2025, 10:54 pm

Yes, you may be creating another thread soon. Honestly, this is not surprising.

I have been waiting for this. I'll buy BTC, hold, and STFU.

Bastille - February 27, 2025, 11:23 pm

To be honest I'm almost glad it happened, I missed so many times buying BTC, but I'll give a try and put some K when I can

Costanza - February 27, 2025, 11:28 pm

Yeah whole situations fucked , im down 50k atm of my own money i put in rip lmao

Beherit - February 28, 2025, 12:25 am

High fear, time to buy.

B3A - February 28, 2025, 12:50 am

Pi is rising , btc is falling. Interesting times you going through

raceconditioned - February 28, 2025, 2:42 am

Things will turn guys, take advantage of dips. Strategic Bitcoin Reserve coming this year most likely. Institutions are bullish. It's just temporary markets reaction to Turmp's changes.

Braco22 - February 28, 2025, 3:18 am

The market is getting primed for the biggest reversal to the upside very soon. Fear&Greed index is under 20, this coupled with almost ANY of the following news and it will be a nice reversal.

- 15th of March FED meeting (Even if neutral, Powell can make some promising crypto statement)
- Any state SBR (UT/AZ/OK/TX are close to State SBR, although Utah is at the last Chamber)
- ETH ETF Staking SEC approval (Will trigger companies to get staking dividends to an asset that's rising and not the US)
- Trump and Putin's agreement for Ukraine (Will bring some easiness into the markets)
- Tariffs resolution (Will probably be a few weeks until they are playing GOD and when both nations are hurting they will come to an agreement)
- QE is YET to start which will be the biggest drive of liquidity

Besides the SEC already started dropping the lawsuits like flies, thus easing the regulation and scrutiny around crypto in general. The publicly traded companies from AROUND the world are slowly getting into the BTC ETF and things are going mainstream soon.

Mewtwo - February 28, 2025, 4:28 am

But then comes the tariffs, Americans lives are going to cost 25% more, people are withdrawing their cryptocurrencies to pay bills.

ZinyNet - February 28, 2025, 5:06 am

i told some one my outlook on this around december that this would go down after a trump win the frenzy willll somehow stop for people to rethink their lives, before moving on again

DarkWebInsider - February 28, 2025, 5:15 am

Down 300k in the last week but whatever.

Down 300k in the last week but whatever.

raceconditioned - February 28, 2025, 5:35 am

Down 300k in the last week but whatever.

I am also down half a milly man, hang tight. Not many of us saw that coming, but we are talking a pro crypto gov, SBR etc, so many good things in the cooks, I can't see how this is the end, maybe it will take months etc but it will all rise again.

SIM-2501407 - February 28, 2025, 5:58 am

Below 80k is a great buying opportunity IMO.

I'll buy more if we see a further continuation to the downside this weekend.

Heltooy - February 28, 2025, 6:25 am

Is this the first bull run that started before the halving?

I'm not sure if this is similar to the previous bull run, where we had a 53% BTC price drop (from ~\$64K to ~\$30K), after which it recovered to ~\$69K.

Or maybe it's a sign to sell on time as we maybe enter bear market?

GruntStyl - February 28, 2025, 6:32 am

Just double your DCA when markets are in red like this and put it back to your normal weekly investment when they are in green.

LSD - February 28, 2025, 7:03 am

yep nothing in the last 6 months has been 'scary'

we needed scary before going up. All good

Braco22 - February 28, 2025, 7:27 am

(Feb 28, 2025 05:28 AM)Mewtwo Wrote: [\[CITE\]](#) But then comes the tariffs, Americans lives are going to cost 25% more, people are withdrawing their cryptocurrencies to pay bills.Yeah, that's why I said that the tariffs need to be resolved before we have a big breathing space.

Epic - February 28, 2025, 8:29 am

Personally I suspect BTC could see 60k again, there is a lot of support there.

Traditional markets are holding well at the moment, but a bit choppy. If we see a real downturn in traditional markets then that could mean trouble for crypto.

Don't forget to not put all your eggs in one basket! Diversify, and dollar cost average!

I would love to buy more Bitcoin at 50k-60k.

Braco22 - March 1, 2025, 1:45 pm

I think we can push to close this weekly candle at \$87,000-88,000. Next week are when the tariffs take place, probably other countries will fire back at the USA with their own respective tariffs and it's going to be volatile again.

Lyrlei - March 1, 2025, 3:33 pm

Many threads were made like these with most responses ending up on regret selling too early, or buying "too high". At this point I'm just going to hold unless I really need to use the money.

goodys2m - March 2, 2025, 10:07 am

Just waiting to see how BTC will go on this week .
Probably might be a good time to invest .

vyactor - March 2, 2025, 10:25 am

Just woke up to see the price surfacing over 90k. Great start to whoever bought it while it was near 80k.

Blogger - March 2, 2025, 7:20 pm

Good. Now is my chance to buy more.

StuffSneak - March 3, 2025, 3:53 am

It's already at 94K
But buying BTC is always fine.

This seems to be the trend over time. Im not an expert but over the years this pattern has been observable.

Braco22 - March 3, 2025, 10:13 am

Already \$89,500... What's happening? There isn't a more bullish news than an EO on SBR.

Omniscient - March 3, 2025, 10:47 am

We're hitting into the \$60k range imho within 60 days.

Chrome - March 3, 2025, 1:08 pm

(Mar 3, 2025 11:47 AM)Omniscient Wrote: [\[CITE\]](#) We're hitting into the \$60k range imho within 60 days.

That's pretty grim...

Omniscient - March 3, 2025, 1:10 pm

(Mar 3, 2025 02:08 PM)Chrome Wrote: [\[CITE\]](#) That's pretty grim...

I think grim is where economy is headed. Especially globally because the last thing the Globalists want, is a healthy economy. They'll sabotage it to ensure Trump looks bad. Economic hard-times are nearing.

Not that complicated, Trump is fucking up enough on his own and I say that as someone who voted for him. it's hard to imagine a worse start at a Bitcoin reserve than those awful tweets yesterday, I mean XRP, ADA, SOL? really? Obvious market manipulation to enrich his friends. Tarrifs aren't bullish either. None of this is good for Bitcoin. Stock market tanking every day as well. Inflation up.

It's not the globalists man. There is genuine uncertainty in the markets due to this chaotic administration which is why capital is fleeing US and Russian, Chinese, and European markets are mooning.

I wish it were not the case but Trump is not bullish for the economy or markets at all right now. And again, I say this as someone who voted for the guy

Agreed with this

I liked trump even before he was pro-crypto and all. we thought he was gonna fix the economic problems like he said multiple times.... but nope he is making it worse. it is just pure manipulation ever since the inauguration day

he kept switching the dates for tariffs and is all over the place for it. I think him and his team are just doing this to manipulate crypto and stocks since there is no other reason i can think of. if he wanted to oppose tariffs he would have done it by now imo

B FOR BADASS - March 4, 2025, 5:10 pm

Buy BTC no matter what. Dips are a boon.

abdelx95 - March 4, 2025, 10:50 pm

i live in europe and trust me nothing is mooning of here although is getting all shit!

Where the hell do you read news or inform yourself???

Even i don't like united states for their control over the world and for all wars they did in all those years for their interests using democracy as excuse

What trump and his administration is doing for a long term will be a win if they want to compete with their real enemy and bigger competitor CHINA

they are trying to get out from nato so that will be less billions in defence and let the europe cover this cost

Getting resources from ukraine to get back their billions back(that's was their plan)

destroyed N-o-r-d stream 1 so now the europe is obliged to buy the gnl gas from usa and that cost 3-4 times than russian gas

they get billions from israel and saudi arabia united emirates arabs and other countries

Now for sure they gonna sign some agreements from canada mexico europe denmark ecc.

Omni has been drinking the juice too hard, the markets could continue crashing for months and he's still blame Biden, or the 'Globalists'?! Like Trump isn't the epitome of a Monarch

The motherfucker made his own pump and dump coin

They 'do their own research' i.e. 30 seconds clips on TikTok, if the content is too hard to understand or doesn't conform with what daddy Trump wants then it's FAKE NEWS

the whole world is laughing at America right now, but as always, Americans think they're god's gift and don't understand they can have it better

Braco22 - March 5, 2025, 2:14 pm

Only way out of this situation short term is for Trump to keep pushing Powell to take early rate cuts, oh also, Friday is still a mystery. What will be talked about at the White House crypto summit?

gnojedkire - March 6, 2025, 4:16 pm

That is a red chronic line of the story of bitcoin so far.. It goes down and goes up, but each time far more up as down.

thrudda - March 6, 2025, 5:04 pm

Looks like we'll be getting there quicker. Already at \$78k. I swear, I need to invest in and when you say because your predictions are always so on fucking point. Took me a while to emotionally recover from not investing in WAVE when you said to.
