Hello sir,

Files is on the server.

Sorry only trusted HF members can get a vouch copy.

Hey, [Machiavelli](#)! I don't know why your thread didn't attract more users, quality phish pages on HF sounds great. You can try to make/buy a thread design, or upgrade to Vendor and move the thread inside "Premium Tools and Programs", maybe this will get you more views.

Also, does my account qualify for a vouch copy? I would love to review a page and leave some feedback.

Hey guys!

I received a Vouch Copy from [Machiavelli](#) and I am both highly interested in his work and fascinated by his professionalism. He quickly setup a demo page (in less than a few hours), which was identical with the official Google Meet page, and had a convincing driver error pop up whenever you tried to

connect to the meeting. Everything you could expect from a hq phishing page.

For the vouch copy, he also offered to host it for me, and allowed me to use any payload I wanted to, and although we've run into a small problem along the way, he quickly fixed it up. He was very responsive, and overall a great guy.

Big vouch, and here are some screenshots which he allowed me to post:

Hello, would you be able to make for me a working facebook phishlet and how much would it cost?

mj8109 - June 20, 2025, 5:35 am

Just for everyone's awareness, there's a guy going by Dfella on HF claiming to do this for less, and just straight up scamming. Stay away

Same guy Dfella now threatening me for posting this. He's big mad that he stole \$600 USD and refused to deliver anything. Scam artist.
