Thread: [3 & 6 Month Cellular Service - USA Only | Unlimited Talk/Text | 3GB / Unlimited Data](#)

Oxycodone - February 28, 2025, 10:37 pm

Since the new policy update with the marketplace, I would like to start a fresh sales thread that is encouraging of the new policy update. All other threads regardless of relationship to this thread topic or not, shall no longer be valid. All business must occur through a HF Contract and not off site. Thank you.

USA Only - Quality Phone Service Plans

These for the most part are no KYC verification to use.

No Credit Card is required when registering after purchase of this product.

You will be given instructions, and everything you need to know will be in there.

What you will receive is 1 text document, html document, pdf with everything you need and troubleshooting steps.

If you need help from the start, I will assist in every part of the setup.

If there is any problems, refunds are given.

These plans will not end half way or all of a sudden stop working.

If there is any issues with confusion of your device not being supported, or unable to work on your cellular network because its not network unlocked.

Guess what? If you're reading this still, well I automatically provide a 2nd code (an additional 3 months, or 6 month plan), giving you a total of 6 months total to 1 year of service immediately upon purchase.

(Assuming you have no issues activating both plans, for free.)

If you still for some reason, cannot get this to work. I will not blame you, and simply trust you are being honest, and you will receive a refund (minus any fees for transactions if paid with crypto for example. -- I am not going to be responsible for transaction fees regardless how high or how low they are, that cost is paid by you.)

All I ask is for you to take things serious and try to do everything in trouble shooting to get things resolved.

Work with me. Not against me. I am applying this policy at the moment to all new sales, to encourage trust and to kick start a good deal. I am doing this, incase there is a mistake made, you don't need to argue with me to resolve the issue and have a 2nd attempt for free, or maybe you did everything right and just doubled up on service for the same price.

Plans Available:

Transfer of a phone number is possible, or a new number can be assigned.

3 months | 3GB Data Per Month | High Speed 5G Data | TMOBILE TOWERS | Unlimited Talk & Text - 10\$

3 months | Unlimited Data Per Month (there is a data cap realistically, but plan is labeled unlimited)
| High Speed 5G Data | TMOBILE TOWERS | Unlimited Talk & Text - 35\$

6 months | 3GB Data Per Month | High Speed 5G Data | TMOBILE TOWERS | Unlimited Talk & Text 45\$

There is no gimmick. Other than your device must be network unlocked or work with TMOBILE TOWERS / Network. Unlocked Device highly recommended. IMEI Can be verified ahead of time incase you are unsure if this will work on your device(s) .

Signup and account management has nothing to do with me, and you are simply going to register and pay with the code(s) provided at checkout. Making the checkout balance 0\$, it is up to you to add a payment method if you want to pay for the service after the period of time (3-6moths) is over.

1) iOS 17+ Required for iPhones for example, Not sure about androids. Point is, update to latest OS.

2) eSIM Only Devices

3) IMEI #2 is usually reserved for digital eSIM , and this is usually the best option when using this to ensure correct setup the first time.

4) Reset network settings if you feel comfortable, this helps ensure your phone is ready to accept the SIM Profile.

5) Register & Activate -- Takes apron 5-25 minutes start to finish, depending on a variety of factors. No credit card is required and completed within 3 pages literally. Page 1 is one input, Page 2 is one input, Page 3 is Account owner information (name, address, contact # incase of problems., email) + (not required) credit card info to setup autopay for example. DONE.

It's almost as if I should price these higher, just to ease the mind of any "a deal to good to be true" doubts, but nope. Think I'm lying? Well, I promise you a refund, before you're even a customer. The balls in your court.

Use the contract system to start a HF Contract and provide me what you need to feel comfortable for the deal to be fair an seamless. I expect the same honesty and fairness I provide, and anyone taking advantage of my deal just because how upfront I am with refunds, well guess what? You will loose any ability to get a deal like this again, and I will not associate with anyone I feel like is even a friend of yours, and you will cause people you associate with on the forum, to loose out on a good deal, and I choose to accept contracts only by those whom I want to conduct business with.

If refuse the right to decline service, if I think you even associate in any type way or form, then. you better go to whom that is, and have things done right. If you expect to do a deal with me, do it right. Use the HF Contract System.

Dictate how the deal should go. I will go from there. Be clear and upfront , as im upfront with everything.

[contract=tid]Start Contract[/contract]

Honey Singh - February 28, 2025, 10:41 pm

roaming plans ?

If possible, let me know.

Pr0m3th3us - February 28, 2025, 10:53 pm

Concerning #5...does this auto renew?

Also what crypto do you accept?

Oxycodone - March 1, 2025, 12:48 am

If possible, let me know.

Possible, they're add-ons you can currently purchase to the normal plan and plan to have some at discounted rates in the future, but currently not apart of this sale/deal.

Also what crypto do you accept?

I take basically any within reason. Prefer in no order ETH Network, BAT, BTC, LTC, USDT

and concerning #5, the reason why 5mins vs 25 minutes is usually based on how your device accepts the eSIM .

No credit card is required to use this, but if you want to keep your number and not transfer it, and continue the service. You pay full price. Renew price is not the same as this initial cost price. You can auto renew with credit card, but is not required to use the service and is only needed if you plan to renew.

You can auto renew with credit card, but is not required to use the service and is only needed if you plan to renew.

So every 6 months we have to make a new HF contract if we pay with crypto? What about setup, do you have to do it all over again? Whats the price go up to if one wants to do another 6 months after the first initial 6?

The cost after this period would range from 15\$ for 3gb data plan per month, to 25\$ per month for unlimited. Some cases might be as high as 50\$ it depends on the exact plan. To further explain this, to cut confusion. I am not a carrier service, I am just selling you a deal on a phone plan.

If you wish to transfer your number, you can do so, it might be a hassle but it's that and save by buying another 6 months. or pay the full price per month after the period of time.

This is more so meant for burner numbers, or maybe resell to ebay, or use to get by if youre low on

cash and need to have a phone service for the next few months or longer without worrying about a phone bill.

Technically yes, due to HF Policy update, all sales would require a new contract. Luckily I been a member since 09 and would not likely be leaving anytime soon.

Also reminder, this is an intro offer more then it is a set price for ongoing service as the rate will increase if you choose to pay after the service plan I provide ends.

Ultimately, no credit card required, thats up to you to choose, do you want to pay the regular price ? or do you just need it for 3 months-6months and determine that later on when money situations might be a bit different? Or do you need a legit number, for cheap with data to throw away? Again , not a carrier provider. I don't have access to accounts. Just a reseller of the phone plans.
