Well you can spend them on Amazon..., sell it here in the CE section for PayPal/crypto (tho you'll lose around 30%).

You can also sell them on Reddit, there are subreddits for that, and they have a better % than HF has.

Maybe buy stuff on amazon or exchange for paypal cash on some sites but lost %

I personally would use them to shop on Amazon, but if you're not much of an Amazon shopper, you could always exchange them in the Currency Exchange. There are always people looking to purchase AGC.

You can use it for almost anything, including games that come to mind instantly. Have you tried these series? Palworld, Insurgency: Sandstorm, Rocket League, and Warframe. Could be worth checking out! Some people also trade them for other gift cards or digital goods.
