Pr0m3th3us - March 4, 2025, 3:14 pm

Anyone check this out yet?

Dotexe - March 4, 2025, 3:19 pm

Looks like a typical malware to me, can't reverse it rn because I don't have much free time to spare on it

DramaKing - March 4, 2025, 4:56 pm

Haven't tested it locally, but I haven't been able to confirm that the web app works. It is, of course, useless against real websites. You need lots of bandwidth and requests for that.

Klonopin - March 5, 2025, 6:56 am

From the looks of it, it just spams tons of GET requests to the ip :^)

cebef - March 5, 2025, 11:27 pm

thank you for sharing this.

Hacxx the developer known as Hacxx has created various tools, including some related to Denial of Service (DoS) attacks. For instance, the "Hacxx Latest Scripts - June 2022" collection includes tools like "Hacxx Cbox Ads," designed to spam cbox chat boxes, and "Hacxx Leaf PHPMailer 2.8 Scanner," a scanner for detecting "Leaf PHPMailer 2.8" installations.
