Thread: [WTB Reddit account creation and automation bot](#)

maddevsol - March 5, 2025, 1:16 pm

I am looking for something somewhat already developed and tested.

- I will require a demo
- I will only work with Escrow or a third part site like upwork/fiverr (my only exception is if you deliver the first milestone upfront before payment)
- The above 2 are not negotiable

I want a reddit bot that developed on iOS that has the following capabilities.

- Create Accounts
- Random human actions to keep accounts active
- Scheduled posting and commenting

Please be upfront about cost.
Any insights or referrals would be greatly appreciated
[contract=tid]Start Contract[/contract]

Hey! Same request as for topicstarter here.
I also want to see how it solves the autologin flow.
