Otherwise very good and handy looking web scanner.
Actually it does.

Thank you

are you just asking this, because your crypting service gets dtc by cache..... imo thats just shotty service.

i've seen the contracts you made with that rando about him getting scammed, this is just another one of your coverups....

Thanks for the laugh Rishie.
keep laughing, doesnt help the fact that your shit of a crypting service is highly detected

We've never been detected (as of yet). It's funny because the only dispute we ever had was about support, not detection. You must have trouble reading.

You must've overseen that some of the highest authorities had ruled that out.

Your hatred exceeds you Rishie, It's not a good look on you ;).

Either way, have a nice day.
thats quite unfortunate..... a stab at me and your lying.

the detection was the problem. i was there with @servers in a vc, and i was walking him through and still had issues, its quite terrible that you cannot even admit that

and are you saying the constant "ML" flags your users get arent detections? anyone that isnt stupid knows that they purely are

Video results have been increased to 120 seconds.

G data has been added, but sometimes return wrong results. I'll fix soon.
