Thread: [\[MRT-X\] Malware Removal Tool Development Thread](#)

Tha Sneak - March 12, 2025, 7:23 pm

Note: Post your Github Username in this thread to obtain extended access as the repository will be changed to private by April 2025!

Open sourcing my tool will be posting source code for group development.

Source Code for HF System Scanner: <https://github.com/ThaSneakest/HF-System-Scanner>

A to do list to be completed later.

The following source codes I would like to be modernized and converted to different languages if anyone wants a side project I would love to have some help with these. If you have any questions please ask away!

HijackThis Source Code: <https://github.com/ThaSneakest/HF-HijackThis>

bbEditor: <https://github.com/ThaSneakest/HF-bbEditor>

ComboFix: <https://github.com/ThaSneakest/HF-ComboFix>

DDS: <https://github.com/ThaSneakest/HF-DDS>

JRT: <https://github.com/ThaSneakest/HF-JRT>

Pocket Killbox: <https://github.com/ThaSneakest/HF-Pocket-KillBox>

FRST: <https://github.com/ThaSneakest/HF-FRST>

FSS: <https://github.com/ThaSneakest/HF-FSS>

MiniToolBox: <https://github.com/ThaSneakest/HF-MiniToolBox>

SilentRunners: <https://github.com/ThaSneakest/HF-SilentRunners>

DelFix: <https://github.com/ThaSneakest/HF-DelFix>

ATF Cleaner: <https://github.com/ThaSneakest/HF-ATF-Cleaner>

SecurityCheck: <https://github.com/ThaSneakest/HF-SecurityCheck>

FMRS: <https://github.com/ThaSneakest/HF-FMRS>

KRPM: <https://github.com/ThaSneakest/HF-KPRM>

RSIT: <https://github.com/ThaSneakest/HF-RSIT>

Once the tool is completed and tested it will be used for malware removal purposes on HackForums. I want HackForums and the MRT-X to have homemade tools I know there are some brilliant minds here and I would love to have the community working on these together.

Brendan - March 13, 2025, 6:29 pm

I've always been a little curious how some of these tools were written; seeing FRST as 25k lines of AutoIt code was certainly not what I was expecting.

Is the end goal to have all of these re-written?

I know exactly what you mean lol and yes that is the end goal to have our own HackForums versions of them with our own twist on everything.

Roger that, I've been desperate for a side project so I'd be interested in tinkering with one of these. From a technical standpoint are you interested in them being ported to a specific language? I have experience with Java and C++ but I'd be willing to learn something new :)

I've already ported a majority of FRST in C#, but I'm open to any help or languages I can get it
