Thread: [Clean BitRAT](#)

Badgerssss - March 15, 2025, 8:19 pm

Does anyone have the link or download to a safe clean bitrat version I know it exists m0hx has it anyone else?

DramaKing - March 15, 2025, 8:25 pm

And why aren't you just asking [mention=1441945]?

Maybe explain it, ans someone can find the cause? I downloaded the zip, and Snyke's "Happy decompiling" message worries me.

I've already answered you more than once.

Malware by definition is not safe.

Don't waste your time with this, and especially not the link above.

pass: m0hx.pw

remember, never run on ur own pc.
so run in VM.

thanki

I do have a working copy of the cracking tool to make bitrat work and compile. Is it clean? idk i threw it on a throwaway pc anyway. If you want a copy i can give it to you. Dm me i can send you a media fire link. The crack tool bitshit builder does have like no textboxes to indicate what data is where so just follow the format of the text i saved as builder and you should be fine when you compile it. Idk what crypter to use. I only used it as a proof of concept for a exploit chain.

Can you give me a copy? I can't send private messages.

Its not letting me send a message to you. Then i tried making a contract for \$0 and its not letting me do that since i did not create this thread. This site is becoming more and more inconvenient to use.
