Thread: [Y'll peeps even hacking something?](#)

Infinity. - March 16, 2025, 10:23 am

Or just using paid/free RAT(s)/Keylogger(s) available on this forum?

How many of y'all have stopped script kidding?

Flan. - March 16, 2025, 10:29 am

I personally prefer using paid RATs and keyloggers for better security and functionality. Script kidding can be fun, but sometimes it's worth investing in more reliable tools.

For the forums - an outsourced way of keeping threads / posts in check without overloading staff.

Were you thinking they have some other or different specific purpose?

I was hopin for a personal 1v1 with Omni

Everyone knows the best hackers are the ones who don't know what a MAC address is.

Fresku - March 16, 2025, 3:53 pm

I don't think any serious hacker would talk about their activities on hackforums lounge lol

Pr0m3th3us - March 16, 2025, 4:34 pm

Trying to hack into this can of ravioli currently....

Regulus - March 16, 2025, 5:11 pm

Meh not anymore, I am mostly here because my OG friends (most of them) are still around.

So diz my enswerr

fugattyhacker3 - March 16, 2025, 5:16 pm

Feds moving wild these days who would self snitch ?

Hacking? I thought this was an anime forum.

HaxxorBunny - March 16, 2025, 9:38 pm

only my own devices. for me its all about learning how hackers operate so I can better protect myself in the future.

J?son - March 16, 2025, 10:26 pm

you can find me balls deep in metasploit. all night long bby~

TheFr0ntMan - March 17, 2025, 4:44 am

The last time when I used to hack was when I played counter strike 1.6 20 years ago. The Jedi hack was amazing :)

Lol Good effort.

For me mostly covenant and Havoc but occasionally MSF.
I mean rats server a purpose for hands on once the recon and everything is set.

I wouldn't knock paid or free rats, but to be succesful you need more than just a rat and a crypter.

how many root lists do i need to give to omni so i can get the blackhat award

N604 - March 19, 2025, 12:08 am

Not Hacking anything anymore, I stopped dealing with this kind of things. I just felt like it's not worth it to fuck other people up and make money off it.

that's what i asked in the thread..

"Anyone Hacking something.. or just using rat and a crypter.."

XtremeDiscount - March 19, 2025, 11:18 am

I fucked around with remote administration tools in middle school when I was bored and it was a fun crazy thing to do, but what do you all accomplish with these tools? Not asking you to self incriminate but do you all have ways to make money with them or is it for fun haha.

stroker2 - March 20, 2025, 2:18 am

I think that people don't want to feel guilty about hacking others. But what's the point of telling the affected people that they have a security vulnerability? They'll just insult you.
