Thread: [Making money by selling methods](#)

SIM-5630113 - March 17, 2025, 8:29 am

I have made some methods to earn money online it will not make you millionaire but a passive income.

Now i've made the structure for each method and for some niche's

It is possible to earn anything with it? I know this is profitable for the right person with the right idea.

Creating edu mails is one of the most used to verify accounts and get the student bonus or discounts

DramaKing - March 17, 2025, 8:49 am

The Money section is a good place.

TheFr0ntMan - March 17, 2025, 8:57 am

As far as I know most money making method sellers make more money from selling them rather than from the methods themselves, so I guess its a good niche to earn some \$.

Most sellers earn more for selling . That's why i dont offer a method to start earning. I can provide a sample.

Create gmail accounts in bulk : what i do provide for this?

A software to create gmail accounts in auto pilot mode . Not just that.

The "method" or ebook idk how to call it exactly will have a API provider list to choose among the best deals for each customer .

What else? A custom document to import/export usernames and accounts details.

And in addition a bonus software to create IG accounts because my method is to become a smm provider and use / grant a complex but easy to manage system for it.

I need to solve or better find the best way to adjust and make things more easier than the actual . In tech words my method is a method which includes the tools to do it.

For someone that has Experience in this field and have time to take the effort , yeah you will make money more than me actually but that's not my promise .

I've saw a lot of threads of methods here that claim "500\$ day or refund" wtf?

If someone can make easily 500\$ per day or even more so easy as they state , why you would sell that treasure info? IYK what i mean

DramaKing - March 17, 2025, 10:39 am

Captcha bypass tools? Ehhh...

SIM-5630113 - March 17, 2025, 11:48 am

Huh? If you meant that if the tool can bypass captcha , yes it can.

There are other alternatives you can search for them at google for captcha solvers.

If you want a custom captcha solver for an specific company , that's ain't hard to make.

I mean you got to shoot your shot. If you got something that works and make money, people will pay you good \$ for it.

I've been in different forums for the past decade, I bought a lot of methods that were super bad and made me loose money but on the other side I bought methods that made me really good money so overall I'm always with positive attitude towards them. Most people think that if someone sells a method its not working but they need to understand that there are methods which for example are caped at making \$1000/month

So if the seller got a working method like that, he can sell it for like \$500 and make way more than that per month + the customers will be happy too cuz the methods works.

According your experience with methods , for example have you bought any with similar titles like “Earn 500\$ per day” or “\$10k month method” “ Zero Effort “ lol

This kinda posts for me the method is very useless since just the thread’s title is a click bait.

The method gave you the chance / idea / insight or anything but bruh for real? No effort? Why do you sell such thing?? Instead you can buy 100’s of computers and just farm the method right?

Idk what’s the catch but obviously there is one , there is no way that someone will share such thing , would you do it? At least i will sell that if the method is saturated.

Instead a method i want to provide a full guide plus tools to automate process and make things more easier but not just “earn money” you have to run software , create accounts and etc. I know , is quite easy but a person whom is dedicated will verify each process of creation and each stuff. I can give ideas , i have saw one (the best so far) that the guy shared everything to make your own setup and start earning since you pay my method , and yes thats right. Earnings from the minute zero.

With a fully well explained guide plus tools and support or assistance and more important an scalable and PERSONAL setup i know is possible to do it but not just following a book lol .

If you have anytji
