Thread: [Cryptocurrency Tutorial CRYPTO STAKING- \\$50 per day - FREE METHOD](#)

zipix59 - March 19, 2025, 10:04 am

Hi, I want to share with you one crypto staking method I found on one of the paid forums.

I used a capital of \$800 and in a day I earned about ~\$400 per day.

In short, we will earn 0.5% for each transaction to the EOS network. For this we will use their coin EOS.

The most important point! You need to use the MEXC exchange, because I made a mistake at first and used Binance.

Steps:

- 1) Go to Wallet > Spot > EOS > Deposit
- 2) Copy EOS MEMO
- 3) Step back > Withdraw
- 4) Fill in the fields as follows:

Address: [deleted]

Network: EOS

Memo: Copied memo. Important! You must specify each time

Amount: Test on a small amount

- 5) We send and wait 10m, after which we get the whole amount back only +0.5%
- 6) Repeat everything from the first step and get the compound interest

In this way, we specify our own memo, not the recipient's. And we receive the compensation, not them.

If you want to automate this method and not have to work by hand, I can sell you a script

Nice scam bro.

Anyone reading this, don't fall for this.

It's not even a nice scam, it's fairly amateur and a lazy attempt at best.

RoadHouse - March 19, 2025, 12:57 pm

i can not believe this , this is tried this "attempt" on HF, omg
