Thread: [Complete Office365 with 2FA hacking](#)

ReadoneB - March 21, 2025, 1:39 am

YO.

got my hands on a nasty little tool for breaking into O365 environments. this ain't your basic clone page + keylogger setup — this one plays the long game. if you're in the phishing game, red teaming, or just like breaking shit for sport, keep reading.

[b]BLAVCKROCK [/b]

? what it hits:

O365 / Azure AD targets

live token/session hijack via phishing link

bypasses MFA — no push, no SMS, no TOTP

supports replay through custom browser automation

full access to inbox, Teams, OneDrive, SharePoint, Azure portal (via Graph API)

works against orgs with “secure” configs (lol)

? features:

stealth login via captured cookie

advanced user enum + recon

phishing page included (realistic O365 clone)

logs + control panel for active sessions

can chain with reverse proxy for even deeper access

? access comes at a price.

you're not getting this free. you want the tool? pay up.

don't waste time asking for a demo (though you can request for a 24hours demo to know your money's worth) — bring crypto or don't bother.

i don't work with idiots or loudmouths.
opsec is tight. communication is encrypted. you know the drill.

? disclaimer:
your choices, your consequences. i don't care what you do with it.
this post is for education only, of course. ?

DM if you're serious.

Hi bro, the page looks quite interesting, am into phishing 0365, i will like to ask a few questions, is the link Fud , also does it have features like .html and .svg. thank you.

BTMOB - April 2, 2025, 5:08 am

hi
is there any test to see how it work

TeeTee - May 30, 2025, 2:07 pm

Can your page grab okta cookies?

uchihamandara - June 29, 2025, 4:07 pm

kindly send me dm let talk i need this

hi bro, i need the office365 and how much and also i wanna check if it have live panel

moneyboss - July 28, 2026, 6:36 pm

Are you still active? I'm interested

linuxforce3 - September 22, 2026, 5:26 am

i need to buy script bro dont need link
