Thread: [Async Rat Remote Desktop Not Working/Password Recovery](#)

DeepHack21 - March 24, 2025, 9:24 am

Hi, When I have a client I can do everything else see his webcam look at his files etc but when I try to remote desktop or steal passwords it says I cannot. Only works when his WD is off I have crypted the file and everything its a bat file not exe which is way more under the radar than an exe. I need help making this work. Maybe I put code in the bat file to turn off windows defender? Idk but I have good code in there already like auto start up and adding to exclusions folder when they run as admin. Please help.

My first assumption was AV. WD is blocking the DLLs. If you have admin, you can disable realtime monitoring, but that will trigger an alert.

I don't want to start an argument, but I'd disagree about .bat files being less suspicious or detectable than .exe.

DeepHack21 - March 24, 2025, 10:34 am

Okay perfect yeah I just need remote desktop to work :(

DramaKing - March 24, 2025, 10:38 am

(Mar 24, 2025 10:25 AM)m0hx Wrote: [\[CITE\]](#) Recompile the asynccrat project with latest visual studio and nuget packages , possibly refactor it too.

I'll add DLL support soon.

Also I don't think the password recovery will work anyways it's so old. Atleast with chrome and some software cuz they patched it.

Password recovery might still work. It's the cookies that have the strong encryption updates.

DeepHack21 - March 24, 2025, 10:55 am

If u guys can help me that would be great

DramaKing - March 24, 2025, 10:59 am

To summarize it's the unencrypted DLLs that are being detected. Either disable realtime monitoring with Set-MpPreference or obfuscate the DLL source code and recompile until the file is no longer detected. Then try it and see if it bypasses behavioral detection.

katzadmin - March 24, 2025, 11:49 am

password recovery probably still can work but cookies already patched app bound encryption

Whenever the RAT needs to load a DLL, it cannot because of antivirus.

MrHudson185 - March 24, 2025, 12:37 pm

password recovery works for edge in latest windows 10 with defender disabled

DeepHack21 - March 24, 2025, 6:33 pm

yeah no shit when WD is disabled both of them work idk how to make it work without disabling windows defender its fine my boy m0hx will fix it :)

cipher2020 - May 8, 2025, 8:33 am

Does anyone have the async rat modified with the WD exclusion and av removal dlls?

Packages_33 - May 11, 2025, 9:48 am

comments are the IQ level of the forum, actually the functionalities all work, all you have to do is obfuscate the dll

shadow2511 - May 14, 2025, 1:51 pm

hello im shadow nice

alexvenutelli7 - November 22, 2025, 4:52 am

Hello guys, I am also very interested.

You need help setting up a rat? or are offering to set one up.

benio2 - November 22, 2025, 4:23 pm

That rat can bypass a lot of AVs if you have a decent loader and not converting your extension to shitty bat. it has nothing to do with obfuscation either. It's all runtime detections caused by AMSI.
