? A 5-user, 1-year subscription to your email is \$35

? A one-year 1-user subscription to our email is \$19.99

? The accounts are completely legal

Hotspot Shield is a functional tool that protects the privacy of personal data and Wi-Fi connections and also provides unlimited access to content and other features, such as unblocking websites, anonymous web browsing, protection of banking data, passwords, and downloads from spyware and intruders. For protection, the HTTP Secure (HTTPS) protocol is used, which allows you to maintain your privacy and anonymity when using unsecured access points.

Key features:

?Unblocking websites (YouTube, Facebook, Twitter, etc.), the ability to bypass filters and firewalls.
?Anonymous web surfing - visiting the desired websites, performing Internet transactions, downloading files, etc.

?Hiding the real IP address.

?Privacy and secure browsing, thanks to the protection and encryption of all data, including passwords, financial transactions, and instant messages.

?Providing safety when using public Wi-Fi hotspots.

?Protection against malware, phishing, and spam sites.

?Anonymizer.
