I'm a little confused. You say you're showing us your latest video, but then you say it's a year old? I am interested though. I want a link to your free discord. I like how she has my breasts.

The only thing that seems to be AI generated in the model is the huge milkers.

But, if the whole model was generated with AI, that's some serious skills. Gonna follow to learn the trick mate!

I filmed that first part a year ago wasn't going to upload or do anything with it.

I thought it would cool to show the progression and how I went from that studio to where I am now.

Uploading a bunch this week.
