I recently purchased Notion Edu Plus for \$25 (1 year) and have been using it for a few days now. Everything works exactly as promised. The activation was simple, and the subscription works without any issues. The seller, digital2key, was quick to respond to my questions and made the whole process smooth and stress-free. Based on this experience, I will say the service feels reliable and trustworthy. So far it's a solid 10/10, and I will definitely come back and buy here again in the future.
