Thread: [Do you guys Ways to Buy Crypto Without KYC](#)

Fugazi - April 8, 2025, 4:34 pm

Hey everyone, Are there any platforms or methods you know of that allow for crypto purchases without requiring identity verification?

I'd really appreciate any recommendations or tips. Thanks!

Peer to Peer works well enough. You can likely buy crypto from someone on HF in our Currency Exchange forum.

There are few options out there like local peer-to-peer (P2P) platforms, or sometimes certain exchanges offer lower verification levels for small amounts.

You may use [Currency Exchange](#) (Make sure you check for active deal disputes)

Alternatively, I have heard good words about <https://changenow.io/> which you may try.
Always proceed with caution!
