Thread: [THE WAIT IS OVER. GTA 6 IS COMING.](#)

Toss - April 13, 2025, 4:05 pm

The long awaited GTA 6 will be coming out but the thing that is disappointing is the fact the game went from some what \$50 when it was GTA 5 now its \$80 to \$100 for GTA 6 and the most disappointing thing is they not releasing PC version at the same time.

? Rockstar has officially announced that GTA 6 will release in Fall 2025 for PlayStation 5 and Xbox Series X|S.

? No PS4 or Xbox One version — it's next-gen only.

? PC version is expected later (likely 2026, just like previous GTA games).

So if you're on old-gen... this might be your sign to upgrade ?

it's likely GTA 6 will hit PC in mid-to-late 2026
Expect better graphics, performance options.

With PC being a go-to gaming system for gamers nowadays you would have thought they'd release at same time.

What's everyone's opinion on this.

You used AI to write up something we've known for a few years now?

Gives me time to save for this, or a 5080ti since it will prob be out by then.

I've not long got 4060 ti for my build so an upgrade for me is far off but what's the comparison to 40 Series to 50 much or not?

Video games became too expensive, I've never been a fond of GTA by the way, and as I'm getting older I also loose interest in video games.

I'll pass on this one, but hope my gaming fellow on HF will enjoy !

Having to play 60fps for an entire year will eat at my soul but I have to.

100\$ for a game....this world is rotten

plops - April 15, 2025, 12:54 pm

\$100 to roleplay is so funny. I get a kick out of watching people troll roleplayers on GTA. And the people who think they are scary on there.
Lotta money in hosting those servers though.

Im almost 40 and i game every day ??

10/10 no life. ?

I don't play video games for the most part but have always loved GTA, been playing it since 1st grade.

Tempting to buy the next Xbox just to play GTA 6.
\$100 isn't bad considering how long I've been waiting for this, if it was on the old xbox it would be a no brainer.

PSNReady - April 21, 2025, 11:59 am

It's going to be crazy for game sellers like me ??

Sam - May 2, 2025, 6:31 am

Delayed again lmao. <https://x.com/RockstarGames/status/1918265468076605706>

Zher0 - May 2, 2025, 6:59 am

Rip. Delayed and the TTWO stock is going dooooooown.

oregasupe - May 2, 2025, 7:52 am

Well now with the delay, PC port might be in 2027.

gnojedkire - May 3, 2025, 2:40 am

Gta 6 is coming ... And delayed

McClubbin - May 11, 2025, 12:47 am

Better be a grand slam, maybe my great-great grandkids will be blessed enough to experience day 1.

toast e - May 11, 2025, 1:50 am

I Don't understand why the PC ports are always released years after the console versions. These games are literally made on computers. Probably just going to end up buying a PS5 pro at some point because the wait will annoy the shit out of me.

abdulkerimbarda - May 13, 2025, 12:14 pm

I think GTA 6 will be delayed once again.
