Thread: [FLIP TOOL - Making flips easier - The Joker](#)

The Joker - April 14, 2025, 11:06 pm

Hi flippers,

I love to flip in convo just like the rest of you all. But you all would agree copy pasting "/flip" command and changing the amount every time you flip is a pain.

That's when I thought an extension to make this easier would be cool and I actually made one.

You have 5 Buttons with customizable values. Just tap the button and flip. By default, I have set the values to be "10,25,50,100,500" If you want to flip for 10 Bytes, you hit the "10" Button. For 100, the "100" button. You can change the values to any amount you like.

Spoiler ([Click to View](#))

I'm sure this will come in handy if you love to flip.

Cost of the tool is 250 bytes(That's the minimum allowed). if you can't afford, PM me, will send the link ;-)

Pr0m3th3us - April 14, 2025, 11:11 pm

If it is allowed ill use it.

The Joker - April 14, 2025, 11:13 pm

Great! Would you pay 500 Bytes to get it though?

With the recent award for the flip this might be a hot commodity, which means you may sell alot, which means there is no reason to be greedy. But then again, im a socialist, fuck capitalism.

Yeah. I actually flipped a 1000 times in a few minutes with the extension.

If this is allowed, I'm sure everyone would flip 1000 times easily. As long as they flip responsibly ofc.

Hopsin - April 15, 2025, 1:42 am

Send me for beta testing!

The Joker - April 15, 2025, 1:43 am

I'm waiting for a staff to approve before releasing

I've sent a PM with the link for testing though. Do post a review!

Although, similar plugins do exist in general, this one is quite simple and can be used exclusively for HF.

I tested it for basic flip usage and it was fairly easy to use, light and quite fast!
Good luck with your approval!

I'm sure this will come in handy if you love to flip.

But, is this allowed? it's not cheating but rather a tool to make it easy.

Also, if I plan on sharing this for Bytes, how much do you think it's worth?
I want it please, how much? 100 bytes.

How much do you think it's worth mate?

Opening a contract!

plops - April 15, 2025, 9:32 am

Thats cool, makes losing my bytes even easier now lol

Or winning some.

Really. it's all strategy based.

HerrWinston - June 17, 2025, 5:24 am

i would pay these 100 bytes no problem :)

Gianwins - June 17, 2025, 8:22 am

good solution, is this still works? for 100 bytes?

Rsynced - June 17, 2025, 2:47 pm

Are you still using this? Is it allowed? Thanks, I almost forgot about tis thread.
