Thread: [\[Release\] OverTrack Aimbot IA pour Overwatch 2 \[Essai Gratuit 30min | Win10/11\]](#)

Zully - April 18, 2025, 6:25 am

Yo la commu ?

J'ai récemment testé un petit aimbot IA pour Overwatch 2 qui m'a vraiment surpris
Il s'appelle OverTrack, basé sur YOLOv8, et franchement il fait le taf sans injecter quoi que ce soit dans le jeu.

? Ce que j'ai kiffé :

- Visée auto fluide et pas cramée
- Activation clic gauche ou droit
- Aucun DLL / pas de modif du jeu = no ban
- Interface simple .exe
- Fonctionne sous Win10/11
- Essai gratos 30min ?

? Essai gratuit :

<https://github.com/zoulouzou/overtrack-release/releases/tag/v1.0>

? Scan :

[VirusTotal](#)

? Voici la vidéo de démonstration :

<https://www.youtube.com/watch?v=d4lOL5wyA9g>

Je poste ça juste pour partager un bon outil, testez et donnez vos avis ?

I've added this thread to the Hunting Board of MRT-X for an analysis.

The VT report is based on the .rar file, not the .exe available inside. The .exe program has been made with Python. Not sure how reliable an aimbot made with Python is.

Zully - April 19, 2025, 8:09 am

Hello, I understand your message. The aimbot is indeed coded in Python and uses YOLOv8, an AI model trained on tens of thousands of labeled images to detect heads, regardless of the skin or environment.

virustotal .EXE

so no virus in the .exe ?

you can then type overtrack aimbot to find more info
