If I'm here it's because I'm fleeing from what's coming with the .onion, it doesn't seem like things are going to end well, I don't know if you've heard what's happening, but it's coming down and it's believed that there are already media controlled by government bodies, so things are tense and there are many people included, losing money due to the scams of many of the media and websites that were legal and stable.

If you are interested in the topic, I will bring you up to date, although I imagine you already know what I am talking about.

I'd be interested in hearing your opinion on what's happening. Welcome to the forum!

Well there are already several websites doing roos, others have been hacked for a few weeks, the thing is that it is already affecting even transport, with mafias that then harass customers, a shame, I have been coming and going for about 40 years and it has always been the same, but now it is more blatant and mafia-like, what I always liked about these media and this network was being able to leave the environment and be able to enter and have a medium where I could enter and find what I was looking for, it is clear that before it was different, I have come back about 6 months ago and I immediately realized that there is excessive information and desire to gain space, so I cannot imagine that it will be one against the other, but in certain trusted forums there has been that of government media taking control of several platforms, but as I tell you, everything is up in the air, for now anubis scam, they do not answer administrators for a few days now and in the orders they are putting users or themselves fake transport companies to then chat with customers, kerberos seems to be also in a very unstable situation, archeypwe have it backwards with attacks at every moment, empire market kicked users out on the first purchase and modified the pgp so they can't enter, in anubis you enter the account and 2fa is deactivated, and that has suffered directly, but it seems to be being seen in other media and is starting to worry users and other websites, since it is said that the beginning of something big, but I tell you that it could be anything, and I have seen this so many times that it does not surprise me, but this time it seems to be something both internal and external

But hey, it's the same old story. I've been searching the Deep for 6 months for all kinds of information, and I've only stopped at a few forums, just going in to get what interested me and leaving. But it's time to settle down in one and I think this could be it. I'll get up to date on what kind of programs you like, what areas are most developed, and see what I can help with. Thanks.

welcome to the forum

tretytui - April 23, 2025, 6:37 pm

Thank you very much for the welcome, I won't be long in leaving today, it's late here and I'm a bit tired, the good thing is that I'm left with a good ending since I didn't like the forum and the truth is that throughout the day I can go through 50 or 60 media collecting information and I'm leaving, but here I get a different feeling also because I'm tired of the process that I've been involved in for 6 months and with a dark ending with loss of money everywhere, but it's time to relax, not take any of the packages or envelopes that arrive at my house just in case and be able to avoid roots in a good place with good company, thank you for the welcome and support

I was going to leave you a program, but it doesn't let me upload files or I'm so tired that I can't do it, tell me what you want and if I have it in my portfolio, I'll send it to you.

Sounds like you got quite a mess going on. Best of luck.

Oh, and welcome in dawg

tretytui - April 23, 2025, 7:19 pm

It's okay, it's all this, that's what I get for going crazy shopping.

Hello, welcome to HF, nice intro

Be aware that HF may be different from the places you've mentioned, there are rules, and some activities are not allowed, some topics are not allowed to be discussed as well. Not convenient, but that's also why we're still online after 18 years and others are regularly taken down. You can share your experience / knowledge from the fields you've mentioned as long as it's for educational purposes, and do not involve members into illegal activities.

Few things tho :

- Do not brag about internet crimes.
