Thread: [Minecraft Macros](#)

usedragon - April 26, 2025, 1:17 am

Hey I'm new to this Forum but i had a question if someone is able to help me with an macro/script is anyone able to make Minecraft scripts for stuff like Automated Fishing on servers? as most Minecraft clients do not work as this server has a custom fishing plugin.
If so please contact me If there's any more questions!!

Fishing? Here you go buddy: <https://github.com/RussDev7/External-Fishing-Bot-For-Minecraft> ~ I use it myself. It works great.

Get <https://meteorclient.com/> It's the best, has everything you can imagine. Also get litematica w/printer for auto building schematics. <https://github.com/kklffaa/meteor-litematica-printer>

You can auto build all these awesome schematics or copy and build your own. I rebuild the default villager houses to make large villages. It's so fun.

<https://abfielder.com/browseSchematics> <---- check it out for awesome builds
