Thread: [where to find a list of all data breaches](#)

afrikasafe17 - April 27, 2025, 4:37 am

Hi

I don't know if there is a forum/website where we can see in real time all the leaks that are happening over the world. I know there was [deleted] but it seems it has been seized by the FBI. Can someone help me ?

Nobody will even if they know it. Because it's not allowed on here.

I asked AI a while ago to give me the same information. I personally find these websites the best for live attacks then obviously CVE sites but when it comes to leaks, you'll never get a hold of them. I'll connect each url with a VT link also.

You've got to know people to get to where you want to be on the DW
