Thread: [price of a cryptojacking program](#)

Jean Bon - April 27, 2025, 7:53 am

Hello,

It's weird but it seems we can buy a cryptojacking program. I would like to write an article about it for informational purpose.

What could be the average price for this type of malware with which service?

Thanks

Check the marketplace, there are paid and free ones

Miners are usually funded through donation percentages.

DarkG8 - May 1, 2025, 11:07 am

Programs:Basic scripts (pest miners, phishing tools): \$200-500

Advanced programs (cryptojacking, wallet exploits): \$1,000-5,000

Custom solutions (for specific exchanges/wallets): from \$10,000+

Recommended services (Darknet):Forums: Dread, CryptBB - here they sell sources and ready-made solutions

Marketplaces: White House Market, Torrez - verified sellers with ratings

Telegram channels: fast, but high risk of scam.

Additional costs:Botnet rental: \$100-300/month

Code obfuscation: \$50-200

Support/updates: about 20% of software cost monthly

All prices are approximate (may not be exact), if you need exact prices, it's better to look on the markets.

white house market shut down gracefully a while ago I believe.

Rax_ - July 18, 2025, 11:45 am

Brother, we are not chat gpt you do not need to say for education purposes lol. But yeah check the market, look for sellers with good rep and vouches.
