Guess its time for you to learn to code brother.

If this is a real 'free money' exploit and someone uses it, they are not going to just hand that over to some rando on a clean, clear-net forum.

Best O'luck boi

I doubt this is real. If it was, that bug would spread like aids just like what happened to the Nomad Bridge exploit in 2022. It's posted on blockchain and everyone can copy the bug easily.

Someone is telling a very tall tale to you.
