[BRAND NAME REMOVED] method for IOS and Android

Step 1 - To start this method, you're gonna have to have some common sense and a couple of dollars to get started. Firstly, you gotta choose where you wanna e-whore, this is essential because the quality of traffic can greatly increase and/or greatly decrease based on how you go about choosing your location. As of now, the better places for e-whoring would equate to places like America and Germany. When choosing a city, you wanna think about where other people are not currently e-whoring, places in America like New York City or Los Angeles are saturated as fuck, you do not want to e-whore in these places. Once you have your location and model set, you would need to buy a phone number for creating the account. The site smspool.com is a great place IMO to get a phone number and it has worked multiple times for me, however, smspva is also a good place. A US number is always the go-to phone number for e-whoring in America. A Swedish number is recommended for other countries. WHEN CREATING THE ACCOUNT, DO NOT EVER PUT YOUR SNAPCHAT/INSTAGRAM/KIK OR ANYTHING IN YOUR BIO, IT WILL GET YOU SHADOWBANNED INSTANTLY.

Step 2 - Changing location can sometimes be a problem for some e-whorers mainly because they do not have access to a PC/Laptop. If this is not a problem for you, the website UnicTools (<https://www.unictool.com/change-gps-location/>) is a great place for changing your phone's location. It's as easy as downloading the application onto your pc, connecting your phone to your pc, and switching your location within the app to your desired spot. After you do this, proceed with the [BRAND NAME REMOVED] account creation. Eventually you will be asked to give pictures of your

model, DO NOT PUT NUDES UNDER ANY CIRCUMSTANCE , casual pictures are fine.

Step 3 - Once you created your [BRAND NAME REMOVED] account, you may be interested in a feature called

"[BRAND NAME REMOVED] Gold ". [BRAND NAME REMOVED] Gold is completely optional for this guide, however, if you want to get

more adds, it is a great way to grow faster. A Privacy bank account or Revolut if you are in the UK will be helpful. This will allow you to create VCC's from a CC to buy [BRAND NAME REMOVED] Gold. This will

require money to create but refunding is possible. To refund [BRAND NAME REMOVED] Gold, you need to contact

[BRAND NAME REMOVED] and tell them you haven't been getting likes/matches right after buying [BRAND NAME REMOVED] Gold. This

will not only refund your payment but decrease the rate of shadowbans in the future exponentially.

Step 4 - This is the part where you start getting adds, to get adds on Snapchat/Insta/Kik, you need to get matches for [BRAND NAME REMOVED]. The more matches, the higher adds. One thing me and Roman

figured out is that every second profile that shows up when you reload the app is a match, therefore being an add. Let's say I just opened the [BRAND NAME REMOVED] app, the first profile that shows up on

the meet screen is rarely ever a match, the second profile is always a match. If you keep reloading the app and like the second profile, it will always become a match, repeat this like 50times and you could potentially have 50 adds. Step 5 - Now that you have your [BRAND NAME REMOVED] account set up and are getting steady likes and adds,

maintaining the account for a while might be a challenge if you are new to [BRAND NAME REMOVED]. I also see a lot of [BRAND NAME REMOVED] methods promoting Swiperino to auto add people, I think this is absolute garbage and you're a retard if you use that, it also gives you a much higher chance of shadowbans when you are new. Having a 1-2 sentence conversation with your [BRAND NAME REMOVED] match will always be a good sign for good quality traffic and greatly reduces the chance of a [BRAND NAME REMOVED] shadow ban/report. After this 1-2 sentence convo, make sure to hint that your [BRAND NAME REMOVED] is glitchy or you are not online on [BRAND NAME REMOVED] very often and prefer to use Snapchat/Instagram/Kik to communicate. Having a VPN when you are on [BRAND NAME REMOVED] is not suggested and will get you banned, proxies are always better on top of UnicTools spoofing. I REPEAT DO NOT USE A VPN AND DO NOT PUT SNAPCHAT/INSTA/KIK IN BIO. If you are adamant about meetup scams then I recommend un-matching with whoever you are trying to meet with. This applies to blackmail as well.

How to recreate [BRAND NAME REMOVED] accounts - A shadowban in most cases, is nearly inevitable. Because of this, learning how to recreate accounts for [BRAND NAME REMOVED] is indispensable knowledge and greatly increases your potential customers. To do this, create a fresh email with temp mail and buy a new, fresh phone number off smspool or smspva. Using the same device is fine and using the same location is fine although you might need to change the birthdate of your model by a day/month/year.

Unsaturated Places for Dating sites - Unsaturated places I have found useful include the following: Dallas, Houston, Chicago, San Diego, San Francisco, Denver, Austin, Jacksonville, Nashville, Phoenix, Seattle, Atlanta, Boston, Oakland, and Cleveland. However, there are many other ways to get traffic that are far less saturated and much easier to learn and keep up with. You just need to find them.

How to Maintain Steady Traffic Shit, this is the part where I tell you "oh time to collect your money from these mfs" but nah fuck that. This is the part where the grind and magic happens. Everyone on these dating sites has money and is a human behind your screen, there is no significant quality traffic increase that SE cannot do. Therefore, toning your SE skills and recognizing who is a time waster is fucking CRUCIAL.

SnapChat and Instagram - If you are using these 2 or even both, then good for you, you already have an advantage over the African fucks doing this on sugardaddyhabibiwantsbuttsex.com, however there are ways to make this more lucrative. If you are using Instagram, there is a way to boost follower counts with bots, they cost money however, just like boosting your snap score. My go to SMM panel for botting instagram shit is <https://prostsmm.com/> at 0.48\$ per 1k followers. Snap score sellers vary in many different prices and methods of boosting. If you are selling pictures on this platform, do not post your nudes or prices on your stories or you will be flagged.

Payment Methods - Fuck yeah this is where you're dumbass gets the moola. Payments are mostly sent through PayPal, Cash App, or Venmo. Out of all of them, I prefer Cash App by far because of the versatility and simplicity of the app. You can also clean the money on Cash App by transferring the money into bitcoin which is some legendary shit.

Time Wasters and Retards - This is THE most irritating part of e-whoring for beginners and advanced players in this game. Time wasters are what differentiate good and shit traffic. Indicators on time wasters can be found in: Their jobs, how often they hit you up, their ethnicity, how they look, and how often they bring up the topic of casual meetups. My go to traffic when selling pics is to send the potential customer 1-2 sentences like "Hey hru" or "I'm good hbu" or information about my model like how college/work is going. After you develop a somewhat

personal connection with the person, you hint at giving them nudes for some money because you are broke, tell them that you have never done this before and that you developed a connection with them and trust them that they will not leak/make fun of it. If they refuse, ignore or unadd them, if they add you back, don't text them until they bring up money. Do not block them yet, just give them their time to think about what type of bond they could have made with the only female interaction they had in their life, the good ones will come back and spend. This process of weeding out individuals comes with lots of practice and experience so it is harder to articulate it into words.

Brain Davis - *January 13, 2026, 12:16 am*

anyone uses PoKeep Location Changer here? It's a newly launched app and seems good.

Tekasa - *January 13, 2026, 3:14 pm*

Does anyone still fall for this?
