This Land is My Land.

Infuriatingly glitchy though.

I'm still enjoying league of legends - although its toxic. Anyone tried the new RuneScape?

Any Battlefield, BO6 and all other next gen CoDs along with mobile, Elder Scrolls' series, and OSRS is also a title that's old-fashioned but I could play for hours. When my wits are about me I also enjoy the Stalker series, especially 2.

GTA, Watch Dogs, and Cyberpunk are on my list right now.

I enjoy open-world games with that tech/crime aesthetic.

Although The Last of Us is a timeless masterpiece, I could also repeat it shortly.

Been playing the hell out of the new (aka remake) of the Elder Scroll game. And then I've kept up with OSRS since it first came out

Hello Testing100,

Does the remake still stutter or have they solved that issue?

Elden Ring has so much to do, and the bosses are really cool.
