### The Best Way to Watch IPTV on Firestick / Android TV – TiviMate Installation Guide

Follow this easy step-by-step guide to sideload and configure TiviMate, one of the most popular IPTV players for Amazon Firestick and Android TV devices!

**Step 1: Install the Downloader App**  
On Firestick: Open the Amazon Appstore -> search for "Downloader" -> install it.

On Android TV: Open the Google Play Store -> search for "Downloader" -> install it.

The Downloader app has a bright orange logo.

**Step 2: Enable Installation of Unknown Apps**  
Go to Settings -> My Fire TV (or Device Preferences on Android TV).

Select Developer Options.

Turn on Install unknown apps for the Downloader app.

This step is necessary to sideload apps manually.

**Step 3: Download and Install TiviMate Using a Short Code**  
Open the Downloader app.

In the URL field, enter the code: 3730736 -> press Go.

When the page loads, select TiviMate -> Download the APK.

After downloading, click Install, then Open.

TiviMate will now be installed on your device.

Step 4: Set Up Your IPTV PlaylistOpen TiviMate -> select Add Playlist.

Choose Xtream Codes Login (or M3U Playlist depending on your provider).

Enter the Server URL, Username, and Password provided by your IPTV service.

Click Next, let it process, then click Done.

Large playlists may take 30–60 seconds to fully load.

TiviMate Features You'll LoveFull-screen TV Guide (EPG) with channel logos

Multi-screen and picture-in-picture (PiP) viewing

Catch-up TV support (if your provider offers it)

Favorites, recent channels, and playlist management

Customizable appearance and player settings

Helpful TipsFor best performance, connect to 5GHz Wi-Fi or Ethernet.

TiviMate Premium unlocks features like multiple playlists, recording, and more (purchase through the app if desired).

If channels aren't loading, double-check your login details.

Enjoy your IPTV experience with TiviMate on Firestick or Android TV! ? [warn]
