[USA] Earn \$30 in WLD with Worldcoin + 150 WLD for USA ONLY NEW USERS +Monthly Crypto Drops (No upfront investment)

Hey everyone,

Worldcoin is now officially expanding to the United States, and it's offering a real opportunity to earn some free crypto with zero investment needed.

It's a global project led by Sam Altman (CEO of OpenAI, the company behind ChatGPT) through Tools for Humanity. Their mission is to create a universal digital identity system and fairly distribute value in the age of AI.

? How it works:

Download the World App (available on Android and iOS).

Go to an Orb location to verify your identity biometrically (iris scan).

Once verified, you'll receive \$30 worth of WLD tokens if you use a referral link.

You'll also unlock monthly free token claims just for staying verified and active in the app.

? Referral link (get \$30 in WLD): PM ME !

? World App & 10% Account (Optional Yield)

The World App acts as your wallet for WLD, ETH, USDC, and more.

You can activate the "10% Account" to earn 10% APY on your WLD balance.

Payouts are made in USDC and funds are fully withdrawable at any time.

? Privacy & Security

Your iris image is not stored; only a hashed version is used to create a unique identity.

The project is open-source, and security audits are ongoing.

No payment or investment is required to participate – just the identity verification.

? If you want to dive deeper, here's a recent conference video explaining the project's goals and roadmap:

? Search on YouTube for the latest news on the Company.
