Thread: [Brave Browser Earnings BAT](#)

Rsynced - May 2, 2025, 2:54 pm

How much you guys make from brave so far?

I have not logged into my uphold account for many many months.

Today, I Just traded my 159.407015 BAT for 0.00024344 BTC

Did not expect to make so much for doing nothing....

?

Not much, but recently switched back to Brave after using Firefox for a long time. Not sure yet if I want to switch back to Firefox

I use only brave. It just works so good.

I made way more back in the day. Was like \$20-\$50 a month because of my X account and some other things I did early on the Brave Browser and Uphold. But then one day, BOOM, Uphold closed my account and my Brave crypto account was then closed too. That's how things go I suppose in the world of AML/KYC. I'm sure someone sent tokens to me that were a problem. Was a pretty cool thing for a minute.

That sucks, so your basically banned by uphold?

All told me to fuck off without any reason. But I know the reason, I run HF, they apparently don't like that.

Yes, of course. You can still just make 'NEW' accounts. Does this forum ever cause you stress? You seem like the most chill family person. I honestly am inspired by the way you run your business. Your professionalism is outstanding.

Mewtwo - May 3, 2025, 11:42 am

I remember having 100K BAT in September 2017. It was worth approximately 17 cents at that time. I've never gained much out of it, I was hoping it would reach \$1 at that time but I cashed out too soon. This was during the time Binance allowed US citizens to trade still. I think Omni might have posted a thread during that time which encouraged to me to invest.

This seems like sarcasm because while I believe I run HF efficiently enough, I wouldn't say it was done with "professionalism". But I suppose I'll accept the compliment for what it is. Any business should cause any owner stress, else you ain't doing things right imho.

This is so true. My compliment is not sarcasm. I really think you're a pro! ?

Way to soon, for sure.

I'll accept I'm a pro, but I don't always act professional. That's the demise of being your own boss. Sometimes you just lose your place and since nobody can fire you, well, you tend to do crazy shit on occasion.

I done some stupid stuff myself running an ebay biz with my brother. I once called paypal shit faced drunk and said all this crazy stuff... Surprised they did not close the account.

makeenalaa - May 3, 2025, 3:12 pm

i use it but i didn't make anything from it

Due to where I live and with the amount of ads I get on a monthly basis, I maybe get around 6-8 BAT per month. Better than nothing I guess, but honestly the biggest plus is that I don't see any Youtube ads.

I recommend sponsorblock as well it's an extension where you can skip sponsors. So good!

Hopsin - May 5, 2025, 10:16 am

I lost all my earnings, twice. So I don't bother anymore.

To be honest, I don't remember the exact earnings I had since it was very long time ago, around 200 BAT? (If I am not mistaken)

How did you lose them?

Astonished - May 5, 2025, 10:30 am

I used to use this for a while as well, I remember cashing out and actually bought myself a Sterling Silver neck chain for about £70 I think thats around 80USD or so not really sure. Can't get into my old uphold account as its on an old deactivated email and really don't have the effort going through some sort of support to get into it again (if they even help with that).

I had to do all this verify / id / face scan stuff to get back in mine.

I might do it soon considering passive rewards is passive rewards but haven't been logged into it for probably 2 years and have been using brave anyway just without the rewards enabled LOL.

Probably would've been a few bucks at least

I have the same account on multiple devices, so my BAT earnings are pretty steady.
