Thread: [BadUSB Download & Execute .exe File \[Bypass UAC on Win11, short payload <2 sec.\]](#)

mrunlimited2 - May 3, 2025, 12:04 pm

Offering script for infecting victims by inserting BadUSB (or sending a BadUSB to victim)

- Bypasses UAC on Windows 11
- Undetected by Windows Defender
- Kaspersky Premium isn't bothered at all (when .exe is UD)
- Executing payload under 2 seconds (short blink for victim)
- All script is hidden (only blinking two times with a black console window)
- Execution leaves no detectable traces.

My first minimalist offering.

Price 50\$ in crypto

yes. its the same code i gave you.

You wrote me that its now detected by windows defender. what a pity.

I will work on that.

Thanks for the info.
