Intuitive Interface

Provides a clear and concise user experience for quick onboarding. Through clear layout and intuitive operation process, red team members can quickly adapt and carry out work.

Multi-Platform Support

Fully supports red team assessment work across multiple operating systems including Windows, Linux, macOS and Android. Perfect adaptation regardless of target environment.

AI Agent

Built-in large language model agent provides intelligent decision support and automation capabilities, making red team work more efficient.

Rich Built-in Modules

Over 100 post-exploitation modules covering all stages of the MITRE ATT&CK framework to meet various penetration testing scenario requirements.

Automated Workflow

Powerful automated orchestration and notification mechanisms support 24/7 target state monitoring and improve red team work efficiency.
