Thread: [\[SCTP&TCP - Diameter/SS7 Stack endpoints\] \\$400 for full access in 1 month.](#)

Interconnector - May 6, 2025, 10:09 pm

These are rarely real, when sold publicly. Do not take ANYONE'S word without a demo. It takes less than a few seconds.

SS7 & Diameter Services

I do not appreciate people contacting me what this is, or how it's used after buying it. It's simply an industrial standard, and information is widely available. GPT could probably even solve your coding needs even though it's minimal.

I sell access, servers, endpoints, not cyber security classes. I seriously expect you know what this is before playing with it, be stupid and you can end up being that for 25+

If you're outside of EU - know what you are doing, I will not babysit.

jSS7 base - for messaging/signalling encoding in various layers, SCTP association and handling. Functions already made for properly sending/receiving responses for Sendroutinginformationform, PSI, PSL, ATI, UpdateLocation. Should there be any more, feel free to ask, or simply make it yourself by finding the appropriate application context to it. 3GPP.

Documentation exists in the instructions.txt and along the lines of code. Tested on Ubuntu and Debian, and also comes with package install instructions. WILL NOT WORK ON WINDOWS.

If you want an endpoint of specific origin or properties, do let me know, though be aware it's extremely limited - NO US ENDPOINTS

Diameter Services

- Well, she's a bitch. There's a lot of hops of security, which is extremely hard to obtain, but I got some of it. We've got global access though, and we expect that you know what you're doing, because we got the HSS, agent, origin, etc.

What do I get?

- SCTP / TCP server for SS7 and Diameter.
- SS7 stack configuration and logs.

[contract=tid]Start Contract[/contract]

Interconnector - June 4, 2025, 10:15 pm

Still available, now with 1 in Germany and one in Belgium!

dyingtofy - August 1, 2025, 1:47 am

Have reached out on TG.

Interconnector - August 6, 2025, 6:42 pm

Attention to new buyers:

Before you buy this: do not expect me to have the answer to all of the worlds interesting questions, believe me I'd like to know too!

I do NOT know if YOUR specific carrier out of god knows how many today, will accept a straight up non-manipulated request or not. OR how to bypass it straight away.

I will NOT spend hours doing your work for a demo. I can give your the access you need to prove that it works IF YOU KNOW HOW IT WORKS. If you don't, you better learn a bred species of the languages Russian, Dutch and Chinese put together, because that's what you'll see on your screen. UNLESS YOU GOOGLE AND LEARN.

Do NOT message me for trials or freebies anymore. My reputation is fine.

chk888 - September 7, 2025, 2:43 am

Give me your contact information.”

chk888 - September 15, 2025, 10:03 am

“It's really been a terrible day. I paid him, waited for two days, and he hasn't provided me with anything. Did I run into a scammer?”
