Edit : Closing This , Nobody Interested , keeping it private.

Hello, before I make a nice thread design. I ma test the waters out first.

- 1) Works all countries.
- 2) KYC Required for withdrawal.
- 3) Its Whitehat. Its Trading related.
- 4) Its passive , u just invest that's it.
- 5) Min \$1000 Deposit Unfortunately.

=====

I currently have \$3000 invested.

Earnings you will get around 15-20% each month.

Yes its trading related. You will need a platform for this.

There will be 60% profit you gotten from the investment and 40% for the platform.

You will also need to pay a \$50 monthly sub.

^ Do not worry on this as the income you earned from this is able to pay that easily.

I have \$3000 invested and yea I earn extra like \$300 per month or lesser , its passive like I said no work needed.

If you are interested let me know. Remember not get rich quick type of stuff.

=====

How much for the method? Honestly your payment is just the deposit min \$1000 not to me but the platform that's it.

Only for people with cash behind them honestly. Not get rich quick but slow and steady trading profits stability and passive.

I have \$3000 invested and I pretty much can double that in a year, yea I know not much but remember its passive and u can withdraw every sunday and even your investment captial no issues

, its not locked.

Min is \$1000 and Max is currently \$3000. You can deposit in between and do the calculations yourself for the ROI.

(May 7, 2025 11:36 PM)Artisan Wrote: [\[CITE\]](#) Since it is trading related, how can the % return stay in the positive consistently?

Its safe trade. Its based on AI. the worst days you get 13% etc.

I can show you the charts and the results since 2023 All the information.

Now the thread is just a sketch etc. I'll explain all in 1 on 1.

Its gold trading. Its nothing secret. If you are skilled in gold trading and maybe professional and have trading experience of total 8 years.

I am sure u be driving a sports car now and could even offer omi to buy HF off him.

But yea this AI is not high gain is safe trade. You don't make big money. I have 3k invested I get around maybe 200-300 only per month.

That is after profit sharing 60% for myself and 40% for the AI company and also \$50 monthly sub to pay the company for using their AI.

So without all those with 3000 of 15% monthly , damn that's crazy man to have around \$450 per month and maybe \$600 per month without doing anything.

But nah man , you will have a profit sharing and \$50 monhtly for that so you profits will be reduced after paying all that.

Is fine its not a lot but its passive , who doesn't want money?

Thanks for the detailed clarification. This will undoubtedly help others in pulling the trigger and buying this method.

Got another query. Whats to stop me from running additional accounts that aren't in a profitshare with you?

There's a KYC required for the withdrawal process.

It will be in USDT and for deposit also in USDT.

So if u can bypass the KYC process then so be it , go ahead and abuse.

The more ppl joined the company the better honestly. Like The company is leveraging us investors to trade by using their AI simple as that.

The more money pool the better. I know some users are using 2 or multiple accounts of \$3000 to bypass the limit , they used their sister or whatever documentation to create another account.

The company won't know or care cause in the end they want more ppl to join so the money pool is big and we all make money.

Is something like copy trading , same concept the more ppl join the more % the trader can take. So is a win for everyone.

Andrew Tate maybe is a proven trader? I don't know but yea , look at his lifestyle.

However this is AI , its configured to safe trade , you don't make big money , but you will double ur \$3000 in a year that's the realistic part.

So its still money. But passive , unless go ahead and trade manually if u are good at it.

We won't know for sure. I am risking \$3000 too. Most of the trades and all are verified by <https://www.myfxbook.com/>

All the world wide user balance are verified too. Totaling of 2.60 Million USD starting from 2023 until now invested.

Profits has grown starting from 2023 until now to a total of USD 3.51 million world wide.

Company is from UK tech company who develop the AI and has a certification from <https://www.bvifsc.vg/>

And also their partnership with <https://longasiagroups.com> (Another big global trading group firm.)

If you are familiar with forex gold trading maybe u will know what these company are of and from.

And also the trades will go through MT4 aka meta4trader which is the official trading app used by world wide forex trading users.

Exit scam or not, I won't know. In the end I am just a user.

So don't go pulling that goofy stupid shit on me as I will lose my \$3k too if anything happens. Not my fault. I am the victim too.

Huge warning and disclaimer will be stated in the future.

Money- - May 18, 2025, 6:03 am

Our profits for this week and last week.

Its weekly profit , 4 times a month. Auto pilot and passive.

Our % for this month May , for 2 weeks we got 4.48%.

Remember these profits are calculated after 60% profit sharing deduction.

Yes man , everything can be given privately. I have message you.

They were some updates on May %.

Do note these percentage will deducted again via 60% profit sharing and \$50 monthly sub to use the AI.

Yes many % cuts by the AI company but remember its auto pilot. Passive income. Sleep and wake up to money. Simple as that.

Yes bro I gain commissions. Half of the deposit will also need to be handled on my part. Cause there's 2 wallets.

if you are interested I can give you the site you register and check out around before being serious.

But they need your passport number for the registration tho so yea if u got any fake details or whatever u can use a RDP or proxy to test run to see the site and all.

Everything can be provided, you can do your own research on the company.

Remember I am just a user, I have \$3000 invested.

I held no responsibility if anything happens to the company as I will also lose my \$3000, the AI been back tested since 2022 or 2021 already.

SIM-4331310 - May 21, 2025, 5:26 am

No problem bro. I have sent you a PM. Good luck!

Remember , there's 2 wallet to deposit. You need to register under me to have me handle for you else you can't join the AI.

Long story to explain but this is what I can tell you for now.

Just use an RDP to test out an account and then create one legit real one on ur own browser when you are serious.

Healasuk - May 21, 2025, 5:44 pm

Since this is a maximum 3000\$ deposit, is this just a consistent estimate of 300\$ profit per month, or does this eventually go up, the longer you keep the 3000\$ despoit + earnings within the account?

I have listed the charts above. You can refer them. It depends on market conditions. Remember Gold Trading but using AI, the AI is configured to trade safely and not over trade etc..

some months u get 20% some months you get 18 or 16% etc.. But they were never losing months. Once the AI knows you are in profit it stops over trading etc.

Its automatic, no work needed. 3000 max is just to not overpromise the customers which is us. So they capped it at 3000 max.

The more you make is depends on ur capital , so 3000 is 3000 max , they do not want to overpromise clients.

they will be 60% profit sharing later on after your profit like I said many times already and 50 monthly sub to use the AI.

But all this is covered from your profit.

Realistically 3000 will double in a year , maybe 3641? something like that depends on the market conditions which is the Gold u know same like crypto.

1000 maybe not so much , 500 in a year? yea its quite slow with 1000 as I have friends who invested almost a year.

But its passive so no comment however 500 in a year passive is kinda meh.

That's why I joined and just use 3000 directly , which you can see the profits much better than 1000 , 2000 sure u can , any amounts up to 3000 , just use the charts i provided and do ur calculations and also pls consider 50 monthly sub fees and also 60% profit sharing during ur calculation to see how much is worth it.

3000 to 6641 in a year is after 60% profit sharing and also 50 monthly sub calculated.

Whimsy - May 24, 2025, 5:24 pm

So, if I deposit 3K, I can earn approximately \$500 per month and I will need to pay you 60% from the profit = \$300 + \$50 fee, and I make \$250.

Money- - May 24, 2025, 7:37 pm

(May 24, 2025 05:24 PM)Whimsy Wrote: [\[CITE\]](#) So, if I deposit 3K, I can earn approximately \$500 per month and I will need to pay you 60% from the profit = \$300 + \$50 fee, and I make \$250.

1) You Deposit \$3000.

2) May 2025 Month Ended with ROI of 20%?

3) $\$3000 \times 20\% = \$600$.

4) $\$600 \times 60\% = \$360$

5) Monthly Sub fee = $\$360 - \$50$

6) Your Final Profit = \$310

You will get your profit every sunday. 4 times a week.

Yes there's a lot of cut % by the company. But remember its autopilot and passive , free money? Stable and steady profits. People who are unskilled traders lose their whole \$3000 balance in a day but you have AI now to help you trade and you can sleep and wake up to profits?

Its not a lot of money but you will make money by running it auto pilot which is not bad already honestly.

You can withdraw anytime. But the profit sharing will occur every sunday weekends only and the money to your wallet balance you can withdraw anytime anyday via USDT crypto.

Min Withdrawal is \$100 and a 5% charge fee on it.

And No 40% is towards the AI company not to me. 60% is yours. The profit sharing 60% your cut , 40% towards the company.

I am doing this for commission based, I am just a user. I am in no way associate with them or anything.

But a huge reminder. There will be 2 wallets in the system. The 2nd wallet will require people who have high commission to exchange the balance for you.

I'll handle for you with this part. Yes with contract on HF. I am using my reputation on the line.

But huge warning and disclaimer. The contract is just for me to handle your deposition. You can withdraw to crypto USDT later if you don't want to join anymore.

I am in no way responsible with the funds later on after the deposit is handled. The company is responsible for it and I am not associated with them.

I am just a user doing my commissions. So whatever happens is not my fault as I will lose my \$3000 too.

I am not saying if there will be anything happen but just becareful in the future, we won't know. Ofcourse I am protecting myself too.

It won't be valid or make sense or more so stupid to accuse me of scamming you in the future if anything happens to the company which I will lose my money too.

Right?

Sounds like it. I don't blame you. But its gold trading. All trades are undergone through official MT4 app.

If you do trading yourself you will know. Just think of a crypto AI trading bot , maybe an example would be <https://bitsgap.com/>

You can register under bitsgap and deposit your money there and let it work for you. Yes comissions are involved too if someone refers you.

Same thing goes for this but is forex gold trading AI.

I am already making money anyways.

Since today is sunday for me. I have gotten my profits.

25/05/2025

This is from myfxbook (official real time trades verified)

Updated May Percentage.

I honestly don't blame you anyways. I was also feeling shady at first but this is trading. Forex trading is world wide. Is not some money game or pyramid game anyways.

I am not forcing anyone to join. I am just testing the waters since the first day I stated in the thread.

There's no official design or any structure yet until there's serious people interested with me so I can make this official and serious design than to waste my time for it right now.

I don't blame you or force you honestly. I understand. It sounds shady. But I can provide you all the details if you are interested.

You do your own research and all. If you don't like it you can move on. Nobody is forcing you to give me money.

As with anyone I have provided all the details ofcourse nobody have big amount of money unless is some rich guy whose \$1000 and \$3000 is water to them.

\$3000 is fine for me honestly like reasonable amount.
But I won't use \$10k or more that's too much.

Trading is real my man. Sames goes for crypto trading. You should understand. If its a money game or whatever related then that would be odd for sure.

Maybe if you are a trader yourself you would probably understand the official verified myfxbook and live trades on the official global MT4 app

<https://www.metatrader4.com/en/download>

You can't really fake live real time trades anyways.

Hard to fake 2 stuffs that are official verified by global world wide platforms and processing companies and in " Real Time " Trades.

I would understand its hackforums afterall. Not much people here have financial backgrounds.

Though if its a official verified crypto AI bot then maybe there's some interest but seems not much people here know about gold or currency pair tradings lol.

For now I don't want to waste my time trying to reason but if you are serious let me know as usual. I repeat. Its useless if you know the information. The most important thing is the investment part which I will explain to you.

However forex gold trading is legit. Please use AI to explain what is myfxbook or anything I have given to you like MT4 metatrader 4 etc and what is forex XAUUSD gold trading.

1000 is fine but is quite slow , you can calculate yourself based on the graphs I have given above and do the 60 and 40 percent calculation and the 50 monthly sub. Well is just my honest answer. That's why when I first joined I straight up cashed in 3000. Cause I have the money.
