Hey, welcome to HF

There are many ways, depending on your skills / knowledge / experience. Start to check the following :

- [Buyers Bay](#)
- [Rewards and Small Favors](#)
- [Hash Bounties](#)
- [Service Requests](#)
- [Jobs and Partnerships](#)

You can also look for methods shared or sold by members.

Do'nt forget to read the [Help Docs](#), especially if you plan to deal here, there are important rules and functionalities, such as contracts, deal disputes, credibility, middle-men, and so on ...

Welcome to the Forum!

Many different ways you can make money, just spent a little time looking around and see whats out there. What are you good at?

Is it worth being a vendor? Do you get api access?

I would say so.. but it really depends on what your intentions are. If you're a real hustler, and can sell water to a whale.. then yes, grab that Vendor status and start getting your money how you get it. But if you're not really a hustler, and looking for easy money without effort, then probably not for you.

Not really sure about the API access, as that's not something I use.. but I'm pretty sure one of these other guys can answer that one for you.

Look forward to seeing what product or service you have to offer.
