I used to bruteforce RDP's back in the day about 10 years ago on them 2012 machines windows 7 & 8 lol.. I have no idea if this uses any exploiting or not but i'm curious to see what this is about, I tried to use the attachment but I don't be as active to have the bytes to grab it :(

Could I get a PM with it?

ProxyLand - October 21, 2025, 11:16 am

I have been wanting to grab RDP's for my own use for awhile now because I used to do it back in like 2012 and pre-2012 lol. If I can get it, I don't have enough bytes to DL it. I have PC's to run it and 1gbp's net so haha.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
