Thread: [\[GMAIL COOKIES\] Retriever + Regchecker Steam | Brute Family | Autoload on MARKET](#)

Anwa - May 17, 2025, 2:33 pm

SteamRetriever is a software for automatic re-binding of ALL Steam accounts from Gmail Cookies with the ability to automatically sell on LZT[.]MARKET

I am a trafficker. And I am tired of being constantly deceived by schoolchildren-workers. That is why I created this tool FIRST OF ALL for myself, and only then I decided to share this miracle with you.

Price: \$90 per month of use.

Hey, trafficker. Stop sponsoring poor schoolchildren with material.
I am waiting for you!

Functionality:

- Account linking from Gmail Cookies to Market\Autoreg
- Autoloading on MARKET
- Brute Family, brute family viewing on your cookie
- Automatic price for your account on MARKET
- Detailed Debug for each cookie, as well as manual manipulation if necessary
- And much more...

There are reviews on other boards

Very interesting, would like to take vouch copy and provide detailed review so everyone can be safe it works as described.

It would work awesome with combination of Astaroth, did sent u pm regarding this.
