Thread: [My First Bulk SMS Sendout \(Almost a Disaster\)](#)

papachearsET - May 17, 2025, 2:43 pm

So I was finally ready...

First bulk SMS campaign with Onbuka

SMS Leads? ?
Spam Content? ?

But right before I hit send—
I paused.

Something felt off.

I asked a friend who's been doing SMS forever:
"What's the one thing I should absolutely avoid?"

They replied instantly:
"DO NOT skip the test message."

Turns out, most beginners forget this.

Broken links, weird formatting,
or worse... messages are not sent at all.

That one extra step saved me from a total flop.

So yeah—
If you're about to send a bulk SMS...

Test it first.
You'll thank yourself later.
This particular software eventually works and is helpful for inbox SMS send-out. I tried it yesterday,
and it worked.

Regulus - May 17, 2025, 3:27 pm

Yeah that's also one way to promote a service.

Software URL: relaysms.io ???.

I imagine that the bulk of users here know what a sales page looks like and hate it. We tend to have
experience with the Internet. These forums are not for free advertising.

Sms API like relaysms.jio makes sending sms easier even with shortcode/ SID.
