I was able to contact the OP, and they provided me with a trial. OP was helpful in recommending a VPS to purchase, noting it was quite efficient and well-priced. While a KYC process was required, which is unusual for a VPS, it was a minor hurdle.

My background is in marketing and advertising, so I have a clear understanding of this bot's potential.

Moving on, OP set up the bot and walked me through everything. However, the most significant challenge lies with the proxies. I tried five different proxy services without success in finding high-quality residential proxies. OP stated they provide their own, but they are quite expensive; I couldn't confirm or deny their effectiveness with the service. The minimum monthly price for their proxies was \$300, a cost I wasn't prepared to commit to, especially with the bot itself already costing \$300 per month. Nevertheless, we negotiated terms for \$150 if I choose to continue.

Ultimately, deciding whether to fully commit to trying it out is difficult. I lack the time and resources to fully assess what this software can genuinely achieve, and the overhead is simply too substantial to jump into without certainty. However, for those interested in exploring it, they do offer a full day's trial to help determine its suitability.

I watched the comments section and acknowledged that, the software need proxies and some users tried over different proxy sources and It's didn't work for them you suggested to buy a proxy service from you. We offer free trial, and up on test we mention that its required, also we mention it on website. We don't offer full package because proxy usage is different for everyone. But we have proxy partners where you can get 30% discount using our promo code if you are using our services.

I've had the opportunity to explore the services offered by Google Ripple, and I'm genuinely impressed with the platform's innovative approach to digital marketing automation. Google Ripple stands out as a forward-thinking solution for businesses and marketers looking to streamline and enhance their online strategies with powerful, AI-driven tools.

One of the aspects I appreciate most is the user-centric design of their software. Each tool from the Ad Click Bot to the SEO Boost Bot and the Review Report Bot is created with accessibility in mind, allowing users of all technical levels to get value without a steep learning curve. The intuitive interfaces make setup and customization straightforward, and the team also provides excellent support to ensure a smooth experience.

The SEO Boost Bot is particularly noteworthy. It simulates realistic search behavior to help reinforce organic presence, giving users a smart way to strengthen search relevance and visibility for competitive keywords. This thoughtful use of automation while maintaining control and customization makes it a powerful asset for any growth-oriented business.

What truly sets Google Ripple apart is their commitment to continuous improvement and support. Their documentation and real-time analytics features make it easy to track performance and adjust strategies as needed. Coupled with responsive one-on-one support, you always feel supported throughout your journey.

Additionally, the success stories and testimonials from other users reflect real, measurable results — from improved search rankings and increased organic traffic to transformed campaign performance. It's clear that many businesses have experienced meaningful growth with Google Ripple's tools.

Overall, Google Ripple offers a comprehensive suite of cutting-edge solutions that blend automation with strategic insight perfect for businesses eager to gain an edge in competitive digital landscapes. Whether you're optimizing SEO, boosting online reputation, or fine-tuning ad strategies, this platform is well worth considering.

Thanks at Alex & TB :)

Your google Review new service.

Is it like every other indian provider!

I've used so many and so many all scammers. They post it, it goes live and gets removed next day.

You state on your own google reviews, that you dont pay for it to stay. Then its like throwing money down the toilet. Clarify, is there replacement time period? Or its just another bot post, but you marketing it as if it aint. then using disclaimers to hide away from the facts?

Hi, you're right. Paying \$13 and then hitting a second checkout before your first run is a bad start, and we've changed it. Every trial now comes with 100 MB of free proxies, and we've already added them to your account.

Open Proxies in your panel, copy your proxy into your campaign, and you're ready to run. You don't need to buy anything else. If anything gets in the way, reply here and we'll help you set up your first run.
