Riffusion AI Platform

Instantly Create Full Songs with Lyrics

Hey guys, today I will present to you a platform where you can create music yourself, that is:

- Create Educational Songs for Children
- Metal Riffs
- Emotional Duets
- Extend Audio Clips

Tired of the same old AI music generation tools? Here is a new and powerful platform that allows you to create complete music pieces, with voice, lyrics, chorus, and even guitar solos, without musical knowledge or complicated software.

Meet Riffusion AI, tool that works directly in your browser and turns simple ideas into real music pieces, just by writing a few words.

How to Get Started

□ Go to: <https://www.riffusion.com/>

Another option is the Suno AI platform. I'll make a separate thread for that: <https://suno.com/home>

□ Connect with a Google account

It may ask for a profile picture (some users have reported this, so be prepared to put any picture)

Now you're in! Let's make some music.

- Start by entering a short text describing the desired genre of the song.
- Or press the Random button to generate a random theme.

Example: "country song for Saturday night"

Compose Custom Lyrics

Want your lyrics? Use the Compose option.

Not a composer? No problem, just add a prompt and describe the desired theme.

Example:

Prompt: "Create a song for children learning the alphabet using animals, fruits, people, and objects."

Don't like the lyrics?

☐ Give other instructions, AI rewrites them instantly.

☐ When you're satisfied, press Generate Song.

The result? Give this song a listen!

Test Different Music Genres

Try pieces in various styles. Some tested examples:

☐ Metal: aggressive riffs, intense vocals

☐ Reggae: relaxed vibes, positivity

☐ Instrumental guitar solo: no voice, just music

☐ Romantic duet: AI writes separate lyrics for each voice

All you need is a short prompt and genre selection.

Advanced Sound Control

☐ Access: Compose Mode -->> Sound Section

☐ Enable the Advanced Toggle option

Here you can:

☐ Combine multiple styles (e.g., dance + hip-hop)

☐ Adjust the intensity of each style.

Decide where each genre appears in the song.

Example:

Start with dance -> end with hip-hop

Prompt: "Smiles make me feel different... the real world can wait until sunrise"

Transform Any Audio Clip into a Complete Piece

You can upload a piece of sound, and AI will turn it into a complete song:

- Press the Upload button.

- Select an audio sample.

- Set when AI should take control (e.g., after 10 seconds)

- Press Generate

AI will extend the clip into a full piece, with voice, harmonies, and smooth transitions.

Practical Uses

- Create educational songs for children.

- Generate viral melodies for TikTok.

- Create intro/outro for videos

- Create lofi, EDM, or metal for YouTube

Enhance personal clips with lyrics and structure

This is what you also get:

- No watermark

- With a credit system

Has trial + limitations, but I advise you to try it, and if you like it, it's worth paying for

Just connect and create music for free (Trial).

Riffusion AI is still relatively unknown, but it is incredibly useful for beginners and creators.

Quick Recap

- Website: <https://www.riffusion.com/>

- Login: Google account

[]What it does: Generates complete pieces with lyrics

[]Great features: Mix of styles, automatic voice, audio upload

Cost: 100% Free to try (trial)

Leave your pieces or tips below, I might post a set of prompt ideas soon. Be creative!

P??sonl?af - May 18, 2025, 12:18 pm

Awesome site! I already make a great song for one of my game communities. <3

Edit: This shit is amazing! I made so many cool songs. xD

froodle - May 18, 2025, 4:21 pm

brilliant share, for both sites.

JoseMar - May 18, 2025, 10:09 pm

Glad you're getting creative with it. I will share another platform today, called SUNO!?

ABC1234637 - May 21, 2025, 4:49 am

brilliant share, for both sites.

gnojedkire - May 27, 2025, 10:10 am

Thanks for the share and bright explanation
