Thread: [Microsoft 365/Google Workspace private adminaccounts](#)

Commander Spock - May 21, 2025, 6:17 am

I'm looking to purchase global admin/super admin accounts in their own tenants in either Microsoft 365 or Google Workspace.

They need to be private - I'm looking for new accounts.

The license level/user count is not important, just access to email, etc.

Happy to pay crypto. Looking to spend less than \$100 per tenant, and will likely purchase multiple accounts.

[contract=tid]Start Contract[/contract]

(In addition, I'm happy to look at any enterprise stuff, e.g. Enterprise AVs. This is only to be used in lab environments, so don't worry about it being for production)
