Thread: [Mercurial Grabber + Full Source Code \(For studies\)](#)

Franzzzen - May 21, 2025, 11:42 am

Mercurial is used solely to demonstrate what kind of information attackers can obtain from a user's computer. This is a project created to make it easier for malware analysts or regular users to understand how credential capture works and can be used for analysis, research, reverse engineering, or review.

Main options:

- Grabs Roblox cookies from Roblox Studio
- Grabs Minecraft sessions
- Grabs Google Chrome passwords
- Grabs Google Chrome cookies
- Grabs Discord token
- Grabs victim machine info
- Grabs Windows product key
- Grabs IP address, geolocation
- Grab screenshot
- Anti Virutal Machine
- Anti Debug

Recommended: VPS, Sandboxie or Virtual Machine.

Drakaddict - May 21, 2025, 12:02 pm

Price for this? and what file will it be used with?HTML or PDF? Does it requires Crypter?

kamikazepilot - May 22, 2025, 9:14 am

What is the purpose of this post? You can literally download mercurial source code from github.
