Thread: [How can I promote a rummy game app?](#)

JNath - May 27, 2025, 1:17 am

My friend's offering me 25% commision from the profit we generate from his game. The game is fully developed and is present in apk format able to run on Android phones.

I was wondering how can I market it in an affordable way.

This topic might be more at home in the "Marketplace Discussions" section?

Sorry if I am wrong. (I am pretty sure I'm right).

What type of game is it? Also there's no easy cheap way. The only real way is to put ads online on facebook or google.

Or pay youtubers to promote it. Is it a multi-player game?

Promotes it on subreddit Mobilegaming, asking some feedback on there.
