I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

Hi, trading memes is cool and very exciting. Do you analyze wallets manually? I have developed a program myself that searches for wallets under a contract and at a selected time. I also created a

program that outputs signals after token migration in accordance with my filters, it is very convenient for trading, the main thing is not to trade on weekends. Have you tried searching for wallets using scripts?

After tons of research and learning, I finally started printing profits, and now I want to share it all with you for FREE! This guide took me a few weeks to write, and trust me, it's super valuable and worth a lot. I could've charged for this guide, but I chose to give it away for free and help others instead. Plus as a bonus, you'll get the wallet list I've been tracking. Check it out and let's print together!
