Oh_Well - June 15, 2025, 5:05 am

hey bro i have better offer

you send me 100 euros every week and I send you back good vibes

???????? - June 15, 2025, 12:08 pm

70/30 in your favor?

You must be paying for the phones upfront and covering shipping costs on top of that

If you are doing that then sure I'll take a free 30%

however if you think anyone is going to use there money upfront buy the phone pay international shipping for a measly 30%

Is bad business and bad business ethic

If you and your future partner is putting in equally you should divid equally 50/50

As for the billions post that posion leaf referenced no billionaires are on HF if you have that type of capital your not on a forum site I promise you not sure why people flex that on forum sites for as if people are going to bow to you in awe lol

In my overall opinion something ain't right, if you wanna be genuine then you need to have better business ethics

markou2255 - June 15, 2025, 6:20 pm

we can do 5050 i have 10 businesses making me a fortune i cant buy the phones dont have time and i resell them faster if you buy them for me. so money for e money for you. and also for proof i already sold a phone bought 70 sold 130 he got 30 and didnt want to continue got al proof in chat

So you went from being a [Self-Made Billionaire](#).. to now having 10 businesses that are earning you a fortune, but for some reason want people to take their own money.. buy you cellphones, so that you can sell at a pawn shop? That doesn't really sound like the mindset of someone that is already making money... that sounds like someone eager to make some money, by any means necessary.

The statement "I resell them faster, if you buy them for me" ..doesn't even make sense. How would you paying for the phones, slow down the process in anyway? You could easily send the funds electronically, then the person go purchase the phone, then send to you. So your excuse isn't making much sense.

I would advise anyone even considering doing this, to really think about everything as a whole. This doesn't sound like someone who is stable, and earning money. He was just a self proclaimed billionaire a few threads back, but now is begging people to go buy cellphones, send them to him, so he can sell them at a pawn shop... for a 70/30 split.. in his favor? If you're even considering this, just stop while you're ahead.
