Thread: [Looking to Setup Crypto Trading Bots / Arbitrage / Sniper Bots](#)

Austerity - May 31, 2025, 9:27 pm

HF Fam,

I've been diving deep into the crypto world for a while now — running my own platform, doing dev work, staking systems, etc — but lately I've been wanting to get into the bot side of the game.

Specifically:

? Sniper bots (BSC / ETH — you know the plays)

? Arbitrage bots across DEX/CEX

? Any experience with CryptoHero.ai? Just checking if it's actually decent or worth the time

What I'm chasing:

Just trying to learn more and maybe build a solid setup

Would love to chat with anyone already running bots or flipping profits with decent strategies

Open to collabs, knowledge swaps, or even paying for a clean setup guide if you know your stuff

Let's build:

If you've got something running or know where to start (especially with CryptoHero), drop a message or hit me up — I'm all ears ?

No fluff, just trying to link up with good operators who know the bot hustle.

Cheers ?

LMK IF FIND SOME1 WHO CAN HELP

Mskon - June 1, 2025, 2:55 am

i'd really be happy if someone's would do a great job and teach us some of the knowledge on the bot side of crypto world!

please let me know if you got anything helpful, thanks.

[CLR](#) has made a lot of these tools for Solana.

I've made a few tools for Solana as well but I haven't looked into arbing

CLR - June 2, 2025, 11:17 am

Yeah check out my portfolio, happy to help teach, sell you my time and knowledge and anything else. thanks gwiz for the tag

Maxon4ix - June 2, 2025, 3:39 pm

I could sell you o a self made Arbitrage Crypto Bot, PM for more
