What's your price for an account? What's the average time these accounts stay alive?

Kingdom - June 2, 2025, 11:39 am

Price depends upon the duration you choose

Warranty stay valid the whole period you paid for

Send me pm along with details that for how long you want it and i'll revert you with price

I'm currently already using Shark for one of my projects, and it works good for what I use it for. I'm paying the regular monthly rate, was just interested in seeing what type of discount you're offering... let's just say 30 days, so I can get an idea what you're offering.

Your thread says warranty up to 30 days. Which one is correct, 30 days or the full duration. Thanks

If you buy account without warranty then it can last anywhere between 24 Hours to 30 days

But if you buy with warranty then it will cover the whole period of what you paid for and if any problem occurs then we are here to fix it

Thank you

You should put that in the thread, your thread just says 30 days warranty. Not trying to hate but you

will mislead many customers like this

\$4 is not bad, and is pretty cost effective. When my current plan runs out, I will reach out to you and we can move forward with a 30 day account to start things off, and if things workout good, then we can look at doing longer plans at a later date.
