Thread: [Subject: Seeking Advice on Monetizing Large Volumes of Amateur Homemade Adult Content](#)

w00400 - June 5, 2025, 12:12 pm

Hello everyone,

I'm looking for professional advice on how to monetize a significant amount of amateur, homemade adult content that I have access to. I'm particularly interested in methods that are viable in 2025 and don't require strict identity verification of the models involved, as the content features third-party individuals (not myself).

I'm aware that major platforms like Pornhub have increasingly strict compliance and model verification policies, which may not be compatible with the type of content I have. Therefore, I'm curious about alternative monetization routes such as:

Torrent-based platforms

File hosting services with affiliate or traffic-based payout models

Gallery websites or forum-based distribution

Encrypted pay-to-access content vaults

Niche adult communities that accept anonymous or "vintage" content

A few key questions:

Is it still realistically profitable to work in this segment in 2025?

What platforms or strategies are still active and profitable?

What's the simplest and safest way to start monetizing this kind of material?

What kind of earnings can one reasonably expect — whether from traffic, downloads, or memberships?

I'm looking for insights from people with real experience in this field. If you know platforms that are under the radar but still effective, please share — even via DM if necessary.

Thanks in advance for any guidance!

Hi there!

The few options I see viable for you right now, based on the size of your content is either selling the packs to people that do e-whoring, building a traffic site, to use for affiliate purposes under something like chaturbate or stripcash, something like thehun pages, or building a porn site, and looking to sell it in the future.

Either way, if you want to break into the affiliate / webmaster world, you are going to have to do a lot of promotion.

If you want something blackhat you can do, take that content, train a LORA on it and go sell it on fanvue doing a hybrid model, AI-generated marketing clips + AI modified porn clips.

Or use it to generate traffic through porn reupload, XNXX isn't strict about KYC, watermark it and funnel into CB/SC whitelabel.
